Washington, DC 20554

Re: MB 18-184

To Whom It May Concern:

I represent Marble City Media LLC, licensee of WRFS-FM, Rockford, Ala., and WAUA-FM (CP), Waverly, Ala., and am writing in support of the MMTC and SSR Communications FM Class C4/73.215 proposal which could allow eligible Zone II Class A stations to potentially increase power from 6Kw ERP to 12Kw ERP.

With large radio groups in major markets typically dominating the FM band far outside their primary cities of license, such C4 upgrade opportunities for our stations and others in smaller markets could mean better and more dependable signals, more programming options for listeners, and potential improvements to the stations' longer-term economic viability in an increasingly challenging multimedia environment.

Just as your much-appreciated AM Revitalization efforts have helped save many small market stations, small Class A FM broadcasters determined to make a difference for the communities they are licensed and privileged to serve have long been competitively disadvantaged in the shadows of multiple large market stations. We are excited about the possibility of being able to do even more in public service.

I would appreciate the Commission's serious consideration and approval of the MB 18-184 proposal.

Thank you.

Sincerely,

MARBLE CITY MEDIA LLC
